- Cybersecurity: SQL Injection, Google Dorking, Penetration Testing, Network Scanning
- Project Management: Jira, Client Management, Proposal Writing
- Other: TCPDF (Barcode), EmailJS, BulkSMSBD, Laravel DomPDF, Spatie Permission

Experience

Founder & CEO, Inovetica

Dhaka, Bangladesh

Jan 2024 – Present

- Founded an IT company delivering custom web development, SEO, and software solutions.
- Developed a Laravel-based consultancy website with dynamic services, portfolios, and admission forms.
- Managed end-to-end project delivery, including requirement analysis and client negotiations.

Lead Programmer & Project Manager, Eclipse Intellitech Limited

Dhaka, Bangladesh

Jan 2023 – Present

- Led development of Laravel and React-based applications, including POS and ERP systems, guiding junior developers on UI, business logic, and database design.
- Implemented advanced features like Elasticsearch for full-text search, Redis caching, and event listeners for real-time functionality.
- Deployed projects on shared hosting, optimized performance, and integrated third-party APIs.

Key Projects

Eclipse POS

eclipseposapp.com • [Demo](#)

- Developed a POS system with 15+ modules (inventory, sales, accounting), featuring barcode generation (TCPDF), Elasticsearch search, and Redis caching.
- Designed database schemas, UI, and business logic, ensuring scalability and performance.

Sobrokom.store

sobrokom.store

- Built a Laravel-based e-commerce platform with product, order, and reporting modules.
- Optimized performance using caching, logging, and cron jobs for scheduled tasks.

Glowthentic.store

glowthentic.store

- Developed a Laravel and React-based e-commerce platform with Sanctum authentication, Redux, and third-party API integrations (e.g., courier services).
- Designed database and system architecture, tested APIs using Postman.

Accountant ERP

[Demo](#)

- Built an ERP system with modules for accounting, inventory, and CRM, implementing print views, caching, and event listeners.
- Led feature development and guided junior developers on complex implementations.

Additional Projects

- **Eduvoyage Education Consultancy** (eduvoyageeducationconsultancy.com): Developed a Laravel-based website with dynamic services and admission forms.
- **Project Management Tool**: Built a Laravel and React Inertia-based tool for task and team management with dynamic reporting.
- **Zofer ERP**: Contributed to a raw PHP and AJAX-based ERP, focusing on backend logic.
- **Wonderxfans**: Customized themes for a Shopify e-commerce website.

Education

B.Sc. in Computer Science and Engineering (Ongoing)	Northern University Bangladesh
Diploma in Computer Science and Engineering	Bogura Polytechnic Institute
<i>2014 – 2018</i>	

Certifications

- PHP with Laravel Framework, BitBirds Solutions (SEIP), Jan–Apr 2023
- Web Development with PHP (Laravel), E-Learning and Earning Institute, Oct–Dec 2022
